EDUCATION

Polytechnic University of the Philippines – San Pedro Campus — San Pedro, Laguna
Bachelor of Science in Information Technology, Cum Laude — *2020 – 2024*

EXPERIENCE

AI-Driven Programmer & n8n Automation Developer — February 2025 – February 2026
Omelas AI (Startup)

- Developed AI voice chatbot system for HypnoElp mobile hypnotherapy application using webhook-triggered architecture, providing real-time conversational support for users addressing sleep disorders, smoking cessation, anxiety, stress management, and other behavioral health concerns through personalized therapeutic responses.
- Integrated Hume AI emotional intelligence and Eleven Labs voice synthesis APIs to create natural, empathetic voice interactions, enabling users to receive immediate hypnotherapy guidance through conversational AI interface.
- Design and implement complex automation workflows using n8n, MCP (Model Context Protocol), and AI integrations to transform client business operations and streamline internal processes.
- Built comprehensive WhatsApp business automation system using MCP client/server architecture with Z-API integration, enabling automated messaging, contact management, and multi-modal communication processing.
- Developed automated package tracking system (MaxTracks) with real-time status lookup and bulk customer notification capabilities, reducing manual customer service workload by 80%.

Technical Content Creator & Automation Specialist (Part-Time) — September 2025 – November 2025
Zinho Media (Remote)

- Developed n8n automation workflows from conceptual ideas, including content marketing systems, AI-powered stock analysis agents, WhatsApp business chatbots, video generation pipelines, and Facebook Marketplace car flipping automation.
- Created detailed technical documentation and scripts for each automation project, ensuring accurate representation of workflow logic, API integrations, and setup procedures for end-user implementation.
- Captured raw screen-recorded footage following documented scripts, demonstrating complex automation setups including AI model comparisons (VEO3 vs Sora2), multi-platform integrations, and advanced n8n workflow configurations for post-production editing.
- Integrated multiple AI services and APIs including OpenAI GPT-4, Google Gemini, Sora2, VEO3, Firecrawl, OpenRouter, and various third-party platforms to create production-ready automation solutions.

Administrative Coordinator Intern — April 2024 – July 2024
Gleent Incorporated

- Optimized administrative processes through automation, improving operational efficiency by 20% by implementing systematic tracking and automated follow-up procedures.
- Created and maintained comprehensive databases using Excel with automated data validation and reporting features to track over 200 records, reducing manual data entry time by 30%.

TECHNICAL SKILLS

Automation & Integrations: n8n, MCP (Model Context Protocol), WhatsApp Business API (Z-API), Telegram Bot API, Meta API, Webhooks, REST APIs, Google Cloud Functions
AI Models & Services: OpenAI, Claude, Google Gemini, Mistral, Qwen, Hume AI, Eleven Labs
Video Generation AI: Sora2, VEO3, nanobanana, text-to-video/image-to-video workflows
Data & Integration: Google Workspace (Sheets, Drive, Gmail), Firecrawl, OpenRouter, API integrations
Development: HTML, CSS, Javascript, Git, technical documentation, JSON/API workflows

ADDITIONAL INFORMATION

Languages: English (Fluent), Filipino/Tagalog (Native)

Availability: Flexible hours, adaptable to different time zones, experienced with async workflow management

Specializations: MCP (Model Context Protocol), multi-AI model integration, real-time automation systems, WhatsApp business automation, audio processing pipelines
